

# Ministry of Forests, Lands, Natural Resource Operations and Rural Development

**Ended:** High Streamflow Advisory – Mainstream of Upper/Middle/Lower Fraser, Quesnel and North Thompson

**Ended:** 11:00 AM June 10, 2021

The River Forecast Centre is **Ending** the **High Streamflow Advisory** for:

- **Mainstream of Upper/Middle/Lower Fraser River**
- **Quesnel River and Cariboo River**
- **North Thompson River**

The above rivers have peaked at flows between the 2- and 10-year return period levels early this week. Based on the current hydrologic modeling, the river levels are expected to drop further for the next 10 days, though slight rises are possible. Details of the CLEVER Model forecasts can be found at [http://bcrcfc.env.gov.bc.ca/freshet/map\\_clever.html](http://bcrcfc.env.gov.bc.ca/freshet/map_clever.html).

The [River Forecast Centre](#) continues to monitor the conditions and will provide updates as conditions warrant.

---

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
