ENDED - High Streamflow Advisory – Nass River

Issued: 11:45 AM July 2nd, 2021

The River Forecast Centre is **ending** a **High Streamflow Advisory** for:

- **Nass River**

Extreme temperatures have eased through the region, resulting in decreased snow and glacier melt rates at high elevations. River levels have peaked and are now receding.

The [River Forecast Centre](#) continues to monitor the conditions and will provide updates as conditions warrant.

BC River Forecast Centre

Ministry of Forests, Lands, Natural Resource Operations and Rural Development

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
