DISCLAIMER: River Forecast Centre discharge and water level forecasts

Discharge forecasts are derived from a hydrologic model using forecast meteorology, and from a routing model. Weather forecasting and hydrologic forecasting have inherent limitations, inaccuracies and errors. As such, values given should only be treated as estimates, are provided for guidance only, and are subject to change. The actual discharge or water level observed will be different from the forecast discharge or water level.

Colour Scheme for Return Periods:

1-Yr or less	2-Yr	5-Yr	10-Yr
	20-Yr	50-Yr	100-Yr

Important Note: These forecast values are only daily average discharges. The actual instant flows could be larger than these values.
