**UPDATE: Flood Warning – Canoe River**

**Issued: 2:30 PM September 25, 2024**

The River Forecast Centre is **upgrading to a Flood Warning** for:

- Canoe River and tributary rivers around the northern end of Kinbasket Lake

As of 1:30 pm PDT September 25, the Water Survey of Canada gauge on the Canoe River south of Valemount (Canoe River below Kimmel Creek, gauge ID 08NC004) recorded flows of approximately 145 m<sup>3</sup>/s, corresponding to the 50-year return period. The river level is expected to continue to rise with ongoing precipitation.

Fast-flowing rivers pose increased risk to life safety. The [River Forecast Centre](#) continues to monitor the conditions and will provide updates as conditions warrant.

For information on how to prepare for flood hazards, visit [PreparedBC](#).

---

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Fast-flowing bodies of water increase risk to life safety. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
