Ministry of Water, Land and Resource Stewardship

UPDATE – High Streamflow Advisory – South Coast (Sea-to-Sky, Howe Sound, North Shore) (DOWNGRADED)
ENDED - Flood Watch – Central Coast, Fraser Valley North
Issued: 10:30 AM November 13, 2026

The River Forecast Centre is downgrading to a High Streamflow Advisory for:

- South Coast (including Howe Sound, Sea-to-Sky, North Shore Mountains)

The River Forecast Centre is ending Flood Watches for:

- Fraser Valley North (ENDED)
- Central Coast (ENDED)

Weather Synopsis:

Intense periods of heavy precipitation have eased. Continued light rainfall is forecasted into Saturday, with the potential for moderate rain later Saturday and into Sunday.

River Conditions:

River levels through the region reached peak levels on Wednesday and Thursday and have been receding since Thursday afternoon. Rivers are expected to continue to recede into Saturday. Floodwaters adjacent to rivers may take longer to recede. Rainfall over the weekend may cause minor rises in rivers on Sunday, however rivers are not anticipated to return to flood stage.

Actions:
Heavy rain and high streamflow bring increased risk for unstable banks, river erosion, submerged roads, swift water hazards, flooding and landslides. Stay clear of the banks of swift running rivers and never drive across flooded roads, bridges or river crossings.

The River Forecast Centre continues to monitor the conditions and will provide updates as conditions warrant.

For information on how to prepare for flood hazards, visit PreparedBC.

A ***High Streamflow Advisory*** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Fast-flowing bodies of water increase risk to life safety**.** Minor flooding in low-lying areas is possible.

A ***Flood Watch*** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A ***Flood Warning*** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
